REMEDIATION OF HANSEN LAKES TO BEGIN

LOS ANGELES—The U.S. Army Corps of Engineers today begun removing material from the lower lakes at Hansen Dam. The cleanup, expected to last less than 60 days, is part of an agreement with the Los Angeles Regional Water Quality Control Board.

The Corps awarded a \$450,000 contract to Nicole's Construction Management of Perris, Calif., to conduct the cleanup which will include removal of debris and restoration of about 1.5 acres of native vegetation. A silt barrier will isolate the area of the large lower lake where construction will take place.

"We want to remain a good partner for all our stakeholders who use Hansen Dam," said Ed Louie, project manager for the Corps. "This cleanup is a sign of our commitment to do just that."

For safety reasons, the general public will be required to remain outside the clearly posted construction site perimeter.

For additional information about the remediation at the Hansen lakes, please contact the Public Affairs Office at 213-452-3908.
